Volume 3, Issue 19 | 90 Stillwater Ave Orono, ME 866-5690 | March 2015

Preview 3D Models Before Bringing the Hammer

One Stop Home Repair is happy to announce the ability to provide you, the homeowner, with a detailed digital representation of your remodel or new construction project in 3D before we start. We now have a professionally trained interior designer who can assist you in achieving the perfect look and feel based on your style and budget. Call our office to use this great service.

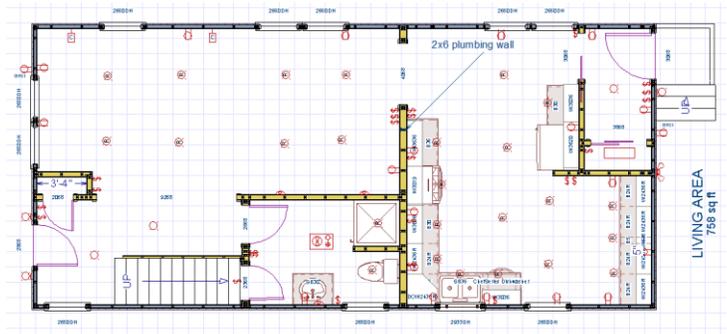

3D view of a kitchen

3D view of bathroom

The kitchen above from a different angle.

All 3D images were derived from this 2D floor plan.

These design plans will help you visualize your finished project. This program enables us to change a 2D plan into a 3D drawing. Our 3D drawings and interior designer are able to let you experiment with different styles and colors in real-time. You will be able to visualize fixtures, appliances, furniture placement, exterior siding, roofing, landscaping, and much more.

Before we start working any drawing can be changed as many times as needed until it's perfect for you. Being able to do this service also increases the accuracy and reduces production time of your project and gives you the peace of mind that you and One Stop Home Repair are on the same page. It's always cheaper to change something on paper than it is to make these changes during the project.

To get the best value out of this program, One Stop Home Repair is offering a free design consult. Where you can work directly with our office staff to find out how well your ideas work together. Give us a call.

Photo of the Month

If your basement is unfinished, we can provide designs with our new service and then finish the work for you. Give us a call.

Did You Know?

On March 8th, set your clocks ahead one hour.

March was originally the first month of the Roman calendar.

Animals wake up from hibernation in March.

March Checklist

Check for loose or leaky gutters.
Make sure downspouts drain away
from house and are clear of debris.

From the ground, you should
examine your roof to see if any shingles were
lost or damaged during winter. Any damaged
or missing shingles need to be replaced.

Flashing around plumbing vents, skylights
and chimneys should be checked and repaired
by a qualified roofer.

Examine the exterior of the chimney for signs
of damage. Have the flue cleaned and
inspected by a certified chimney sweep.
