

## Your Future Includes a Heat Pump Water Heater

An electric heat pump water heater is the most cost effective energy-efficient option available for any of our customers who are looking for ways save money on their utility bills. Heat pump water heaters can reduce the cost of your hot water up to 71% and provide payback in 2-3 years, or even more quickly with rebates that are available now. With an annual savings of several hundred dollars, there is no better way to go green than with a heat pump water heater. Call One Stop Home Repair today to find out how to receive instant savings on your new energy-efficient water heater.

Using the same technology as a traditional heat pump uses to heat your home, a heat pump water heater transfers surrounding air to the water tank, producing cool, dry air along with hot water. They can be set to self-regulate based on hot water demand, as well as be programmed manually.

If the demand for hot water is more than usual, heat pump water heaters will switch to standard electric mode, (also known as hybrid mode), to keep up with the extra demand. These water heaters include other modes as well: Economy, which prevents electric mode from activating, to increase savings. Vacation, which shuts down the heater for a set amount of time, throughout the time you're away.

In order to stay functional, heat pump water heaters require some simple guidelines that are very easy to meet. Ideally, heat pump water heaters should be installed in an unoccupied, unheated basement near the furnace. They must be surrounded by at least 1,000 cubic feet of air that is between 40° F and 90° F year round.

One Stop Home Repair is offering huge savings on heat pump water heaters. Give us a call today to find out how you can save. Claim your discounted heat pump water heater today, 866-5690.

## According to Efficiency Maine

Each year, thousands of Mainers buy heat pump water heaters. ENERGY STAR® reports that these high-efficiency units can save a four-person household more than \$3,000 over ten years when compared to electric water heaters. Other benefits include long warranties and ability to dehumidify.\*

Efficiency Maine offers two ways to take advantage of our \$750 heat pump water heater rebate:

- 1) Participating distributors can discount units \$750 using our instant rebate.
- 2) Units purchased without our instant rebate qualify for a \$750 mail-in rebate.

### Ask Handy Howie

What should I give the most attention when I clean up my yard this spring?

- 1) Clear any debris from your gutters. At the same time, make sure they aren't sagging.
- 2) Inspect your deck for rot and structural defects. Have them fixed immediately.
- 3) Pressure wash your deck, patios, walkways and siding.
- 4) Replace any window screens with tears in them.
- 5) Change the battery in your smoke detectors and ensure they are working properly.

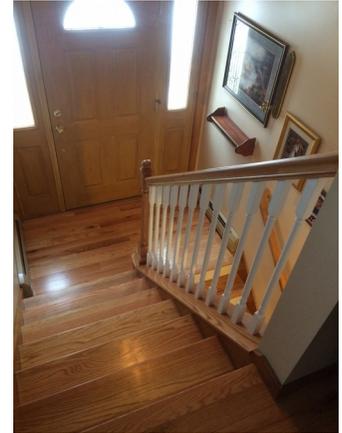

*"An ounce of prevention is worth a pound of cure!"*

### Photo of the Month

Before

After

Red oak hardwood flooring, newel posts, handrails, spindles, tile and trim transform the living room, hallway and staircase of this home. It's a bright, clean look. Great Job, Howie.
