Hire The Company You Know and Trust To Paint Your Home

Painting is a great way to revive the look and feel of your home, both inside and out, without starting over. A good paint job can feel like a remodel and increase the value of your home, especially if you hire professionals. One Stop Home Repair's painting service offers more than just slapping paint on your walls and ceilings. Give us a call today to get the most out of painting your home.

Why is One Stop Home Repair better than the rest?

- A partnership with Second Wind Design provides you with an opportunity to work with a professional interior designer to choose your best color.
- All painters at One Stop Home Repair have years of painting experience.
- Precision and perfection is our priority while being friendly and courteous.
- Before opening a can of paint, we make sure your belongings are protected.
- Familiarity, you've worked with One Stop Home Repair before.

If your interior paint is cracking or peeling, you may have some moisture problems that should be addressed immediately. Painting walls that are scuffed up or stained beyond what cleaners can wipe away is an effective way to cover the stains. Interior paint typically lasts longer than exterior because it's not exposed to the outside elements.

Painting is not only important for looks. Bare spots on siding or trim that are exposed, invite water and other dangerous elements. This exposure allows the paint to loosen and flake, which welcomes mold and rot. There could also be sections under clapboard or between trim where water is trickling through. Paint covered caulking can be applied to prevent run away water from causing more damage. A touch up can extend the life of your exterior paint by 5-10 years. If the exterior of your home is dull, fading or severely flaking, it should be scrapped and repainted.

Call One Stop Home Repair today for a free interior or exterior paint evaluation of your home to protect your investment.

Meet the Crew – Warren Bellefleur

Orono resident, Warren Bellefleur, or Babe, as he likes to be called, is our secondary plumber. He is a master plumber with over 45 years of experience in the Orono area.

He and his wife live in the Orono area and are enjoying their grandchildren and a great-grandchild with 2 more great-grandchildren on the way.

Babe chose to work for One Stop Home Repair because he wanted to earn some extra income to supplement his retirement and had heard good things about the company.

Heat Pumps Now Available!

Photo of the Month

Progression on a house that is being completely redone.

Did You Know?

On June 14, 1951 – Univac 1, the world's first electronic computer was revealed in Philadelphia.

On June 18, 1983 – Dr. Sally Ride, physicist and pilot became the first woman in space. She contributed to a 6-day mission aboard Challenger.

June Checklist

- Test smoke alarms and replace batteries as necessary.
- Remove light fixture covers to clean them.
- Check the unfinished areas of your basement and attic for leaks near the foundation and roof.
- Install a heat pump and save on air conditioning.
- For better air-circulation, let ceiling fans rotate counter-clockwise
- Clean the debris collecting under your deck.
