

## Let's Get This Painting Started!

It's the season for exterior and interior painting. You might be thinking you want to tackle the project yourself. To ensure the best possible quality and time-line, One Stop Home Repair recommends hiring a professional. Give us a call for a free estimate.

To ensure you get exactly what you are looking for, the estimator will take measurements, ask questions, and will take good pictures and notes, then return an estimate you in a timely manner.

What is the Hired Difference?

- Efficiency
  - Depending on the size of the project, there will always be at least 2 to 4 technicians working on your project to push the bulk of the painting out of the way.
  - During the finishing touches 1-2 technicians will be on site.
  - If you tackled the job yourself, it could take up to a month until completion, instead of just 1-2 weeks.
- Safety
  - Painters are constantly standing on tall ladders.
  - They are accustomed to climbing on roofs and leaning out windows to ensure best paint application.
  - They won't push their own limits because they realize what's at stake.
- Quality
  - Professionals will always remember to pay attention to small gaps under side paneling or above a door and know how to fix them so they are not susceptible to mold, critters or other damages.
  - They will cover the furniture with plastic.
- Best Ways to Save Money
  - Move any furniture out of the room being painted, if you can. At least move it to the center of the room.
  - Remove fine art, pictures, quotes, clocks, mirrors, and anything else that you have hanging on the wall.
- Remove switch and outlet covers, all it takes is a flat head screwdriver.
  - What Happens Before Paint is Applied?
  - One Stop Home Repair will help you choose the colors that are right for you.
- We always ensure the best brands are applied.

When your painting project is started, we will always leave the work area as clean and tidy as possible, and pick up at the of the day.

Before they are comfortable saying the job is complete, they will make sure you are happy with it.

### Ask Handy Howie

#### What are the Myths that Surround Painting?

*Painting a Ceiling Makes A Room Feel Smaller* – It all depends on the color you choose. For example, a lighter blue on a ceiling can make a room feel more open.

*Dark Paint Makes the Room Smaller* – Yes, a dark-colored room with dark-colored furniture will feel very small, but a dark-colored room with light-colored furniture can feel large.

*Paint Your Walls White When Selling the House* – No. Instead consider using neutral, modern tones with fresh accents. When it's time to sell, neutral tones will sell quicker.

### Quick Handyman Projects

Even though you can always ask your favorite handyman to help with your quick projects, you can save money by doing some of them on your own.

Applying paint is simple. Buying the best kind of paint isn't. Yes you can paint your home yourself but a professional will know how to make your new paint project last as long as possible.

*One Stop Home Repair understands safety is priceless.*
