“Where One Call Does It All!”

Hopefully it’s safe to say winter is over, for now. This last winter has kept One Stop Home Repair very busy. There were frozen pipes and water damage, roof leaks and ice dams. We shoveled your roofs, installed electric generators, installed heat pumps and did some natural gas conversions. When the storms took down branches, we were there to pick up the mess and fix the damage. As the season began to break loose, we did a few kitchens and bathrooms and a total remodel. We are grateful for your loyalty and patience through the winter. We look forward to working with you throughout the spring and summer. We are always just a phone call away, 866-5690.

Our Handyman Division is your best friend during the warm months. We can replace, extend or build a deck. We can install a handicap ramp against your existing deck or as part of a new deck and match the existing look of the old portion. We can build sheds, prefabricated or custom. We can fix your siding and gutters and even pressure wash and paint. Inside, we can install your air conditioner, fix or replace doors and windows, build custom shelves and much more. If you have a project, give us a call. We can do it.

Our Electrical Division specializes in troubleshooting and fixing troublesome wires and circuits. You can call One Stop Home Repair with your electrical question and we can accommodate your needs and upgrade your home for safety.

Our Remodeling Division is never limited. Any remodel is within our skillset, whether you are looking for a complete remodel or just a fresh new look. It doesn't matter if you want to install new cabinets in your kitchen or gut an entire room or your entire house, we always try to stay within your budget. One Stop Home Repair has the latest innovative software and we can provide you with screenshots of your remodeling project before we even begin building. This unique ability sets us apart from the crowd. Our skilled workers can replicate anything that is produced with the software.

Our Plumbing Division is always ready and willing to tend to your plumbing needs. Our emergency plumbing service is available 24 hours a day. Whether it’s an emergency or a regular service call, our quick service can get your problem solved. You can call us for new fixtures, for repairs, to snake that nasty drain, or replace your water heater. Our licensed plumbers can take care of all your plumbing problems.

Our Heat and Insulation Division is rapidly become our most sought after division. Our thermal imaging camera can show us where you are losing the most heat. The most efficient type of insulation is Green Energy Barrier, which can be inserted over your existing fiberglass or blown in insulation. Green Energy Barrier decreases heat loss in the winter and keeps your house cooler in the summer. The heat pump is currently the most energy efficient heating system available. It runs in conjunction with your standard heating system to make your home more efficient and to **prevent ice dams**. It operates by transferring air from one location to another and it can be used as an air conditioner during the summer months. Our customers have told us they are enjoying the dramatic decreases in their fuel bills.

Whatever your project may be, One Stop Home Repair has you covered. “Where One Call Does It All!” means you have the advantage of one company for all your home maintenance, remodel and repair. Give us a call today to see how our slogan works for you, 866-5690.

Handy Howie Suggests

Apply a new color of paint to give your home a fresh new look, interior and exterior.

Pick a cloudy day to wash your windows so they don't dry too fast and leave streaks.

Clean under furniture and appliances.

Check the batteries in your smoke detectors and ensure that your fire extinguisher isn't expired.

Clean and inspect the quality of your gutters and downspouts.
