One Stop Home Repair Has Great Painters

Painting is about beautifying your home as well as protecting it. Paint is a great way to keep the charm of an older home, while giving it a slightly updated look. One Stop Home Repair is equipped and ready to serve all your painting requirements.

Even though you can paint your home yourself, there are several reasons to hire professionals:

- They can devote all of their time to painting and be done faster.
- They give you peace of mind knowing that the paint job won't just cover up a list of crucial repairs.
- They already have the right equipment and the best tools for the job and they know how to use them.
- Their experience means your paint job will last as long as possible.
- Hiring professional painters adds to home equity.

It's true hiring someone one to paint is more expensive than doing it yourself, but the cost of hiring is well worth it because it ensures the best possible quality and it doesn't interrupt your routine.

You'll be pleased with One Stop Home Repair's work and you will be grateful for One Stop Home Repair's friendly staff who will be there from start to finish. We always make sure all your floors and belongings are protected. Call us today for a free color consultation.

The Correct Lighting Makes a Huge Difference

The correct lighting in your home is very important. You may not even realize how much you are struggling to see your workspace. There are several ways to increase luminosity in your home without any reason to diminish the comfort your current level of light offers. Call One Stop Home Repair to liven up your life with life today.

More often than not, kitchen lighting lacks adequate illumination. Homeowners may not even realize how much they struggle until someone points it out, or until the sunlight hits just right on their workspace. So you don't lose an outlet, One Stop Home Repairs recommends putting hardwired florescent lights that can be turned on with a regular light switch under your cabinet.

Ample closet lighting is often overlooked and it makes a huge difference, especially in locating items in full closets. One Stop Home Repair recommends installing an automatic light that turns on when you open your closet door. Another option, is a motion sensor light on a timer, that turns off with inactivity.

Outdoor lighting is just as important as indoor lighting. To maximize safety, it's recommended that you install motion detecting light fixtures on the front, back and sides of your home. To increase safety even more, install path lights along walkways and driveways to help you to see better at night. Moreover, proper lighting can eliminate dark spots where potential burglars could hide.

One Stop Home Repair is available for all your electrical needs. Our friendly staff is more than happy to help you out. Give us a call today to have all your electrical needs answered.

Go to the Project Gallery and under Plumbing,
check out the Bathroom Makeover.

Ask Handy Howie

Why hire One Stop for your painting projects?

- 1.) A partnership with Second Wind Design provides you with the opportunity to work with a professional interior designer to choose your best color.
- 2.) Our painters have years of painting experience.
- 3.) Before opening a can of paint, we make sure your belongings are protected.

Why hire One Stop for your electrical work?

- 1.) Our Master Electrician has 40 years of experience and most of his experience is with residential customers.
- 2.) He pays attention to details while being friendly and courteous.
